

# PretonSaver™ V3.2

**Unique patent pending print management software reducing ink and toner usage, enabling savings up to 50% of consumable spending.**

**PretonSaver™** is comprehensive print management software for management and control of printer fleets. The software contributes to savings of up to 50% of the consumable budget of companies.

With **PretonSaver™**, companies reduce their overall print cost by up to 50%, save on their consumables spending, implement print rules across users, printers and applications, and reduce environmental stress caused by printing.

## M a i n f e a t u r e s

### **Optimization of consumables**

Using **PretonSaver's** unique algorithms, every print job is analyzed and optimized before being sent to the printer. Optimization allows **high-quality printing while reducing toner and ink usage by up to 50%**.

### **Printer management**

- Active printers are automatically identified, registered in the system and monitored.
- Real-time print consumable and paper levels are monitored and printer counter reading is provided for network printers.

### **Print rules and privileges**

- General page quota and color page quota for users and groups, allowing users to print a set number of pages
- Centralized duplex utility for printers supporting duplex printing.
- Color print privileges for users and groups, allowing users with color privileges to print in color
- Automatic omission of images for specific users or applications to print documents without embedded images

### **Management information**

- Generation of an automatic set of reports and statistics for a complete print resource overview.

## Security and compliance

- Application privileges for authorized users to print from specific applications
- Search for historic print activities for a specific document or user print activities
- Automatic insertion of a watermark on every print job for identification of company's documents
- Automatic user name annotation on each documents for identification of the user that printed a document

---

## B e n e f i t s

**A complete print management solution** PretonSaver™ combines printer management, optimization of toner and ink, management information reports and rule-based printing into a single print management solution.

**Saves up to 50% of toner and ink expenses** with PretonSaver™ unique consumable optimization algorithms, print jobs are optimized before being sent to the printer, saving up to 50% of the toner and ink.

**Complete overview of the print resource** with a detailed set of reports and statistics, PretonSaver provides a complete overview of the print resource and its activities

**Eliminates wasted and unwanted printing** PretonSaver™ print rules enable efficient printing, paper savings and the omission of unwanted elements such as pictures, ensuring efficient printing.

**Easy to install and manage** installing and configuring PretonSaver™ is easy and requires minimal IT resources.

**Increasing data security** with every print job recorded, automatic annotation of user name and time on each printed page, application print privileges and automatic insertion of a watermark, every print job is traceable and accounted for.

**Environmentally friendly** PretonSaver™ software contributes to the reduction of the environmental stress caused by printing, by reducing consumption of paper and consumables.

---

**"PretonSaver™ is a truly remarkable product!"**

***It runs quietly in the background, saves money, provides management information and is easy to install and maintain. Remarkable!"***

Amir Levy, Chief Technology Officer  
**Harel Group**
